Cooling piece
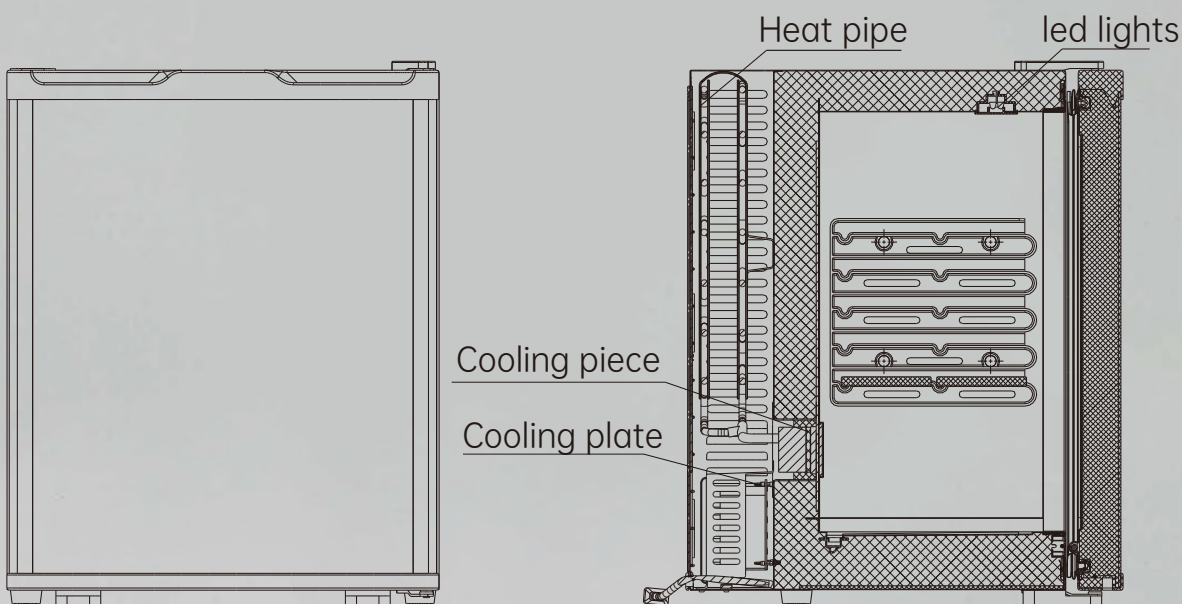

Cooling plate

Electronic refrigerator uses semiconductor thermoelectric refrigeration technology for refrigeration

The electronic refrigerator uses the power board to convert the external AC power into 12V DC power to the cooling plate (semiconductor) to make it work. The cooling plate is cooled while heating, while the cold surface conducts and stores the cold through the metal aluminum and stores it in the refrigerator. The temperature in the refrigerator is far lower than the temperature of the air in the refrigerator, so that the temperature in the refrigerator can be gradually reduced, and the heat surface achieves the purpose of cooling. The heat is dissipated through the circulation of the refrigerant in the condenser (heat pipe).

Mute

Environmental protection

Energy saving

practical

Fully silent electronic refrigerator

Features

No compressor, no noise, no vibration.
No freon, no refrigerant, green and environmental-friendly.
No rotating parts, long service life.
Fuzzy temperature control, green energy saving.
The automatic condensation water evaporation device is safe and reliable.
Built-in soft LED light.

Intelligent Electronic Safe Series

Thickening box material

Solid steel lock lever
16mm

Door thickness
4mm

Adopt Q235 low-carbon alloy steel integrally formed, laser cutting process, multi-face bending precision sheet metal spray molding, hard and wear-resistant.

All steel builds intelligent password control

Insist wtih the use of high-cost raw materials;
micro-carbon alloy steel, strong and strong box.

Bold locking bolt

Using 16mm solid cylindrical lock bolt,
made of pure steel, tightly fit, anti-theft and anti-prying.

Electronic password

Security enhancement

Portable operation

strong and sturdy

All steel builds intelligent password control

· Easy to use
· Large storage space
· Cold rolled steel plate
· All steel solid lock bolt

Fully silent electronic refrigerator

GC right angle concave door series

Function configuration

Right angle concave door design.An anti-pry board is added behind the door panel, which is safely upgraded and has a more beautiful appearance.

◂ Feature:Rectangular electronic lock waterproof PVC film key red LED digital display, electric automatic door opening.

GD-1935-E | Features

▹ Product Dimension(mm)： 355*190*260(WDH)
▹ Packing Dimension(mm)： 405*260*325(WDH)
▹ Net Weight(kg)： 6.92
▹ Gross Weight(kg)： 7.9
▹ Door thickness(mm)： 4
▹ Box thickness(mm)： 1.5
▹ Colour： Black,Pale

◂ Feature: Rectangular electronic lock waterproof PVC film key red LED digital display, electric automatic door opening.

GD-1935-W | Features

▹ Product Dimension(mm)： 355*190*260(WDH)
▹ Packing Dimension(mm)： 405*260*325(WDH)
▹ Net Weight(kg)： 6.9
▹ Gross Weight(kg)： 7.9
▹ Door thickness(mm)： 4
▹ Box thickness(mm)： 1.5
▹ Colour： Black,Pale

◂ Feature: Rectangular electronic lock waterproof PVC film key red LED digital display, electric automatic door opening.

GD-1935-R | Features

▹ Product Dimension(mm)： 355*190*260(WDH)
▹ Packing Dimension(mm)： 405*260*325(WDH)
▹ Net Weight(kg)： 6.92
▹ Gross Weight(kg)： 7.9
▹ Door thickness(mm)： 4
▹ Box thickness(mm)： 1.5
▹ Colour： Black,Pale

◂ Feature:Rectangular electronic lock waterproof PVC adhesiveMembrane key red LED digital display, flip Type safe, electric automatic door.

GD-1935 series

GD-1935-TP	Features

▹ Product Dimension(mm)：362*457*165(WDH)
▹ Packing Dimension(mm)：395*490*220(WDH)
▹ Net Weight(kg)：6.92
▹ Gross Weight(kg)：7.9
▹ Door thickness(mm)：4
▹ Box thickness(mm)：1.5
▹ Colour：Black,Pale

◂ Feature:Wall-mounted cabinet,
round electronic lock waterproof,
PVC film key blue light LED digital
display, electric automatic door opening.

Safe hotel intelligent management system (optional for GC \ CS)

1.CEU also called "decoder" or "handheld device", reading the opening record through the USB interface connected to the safe, and then use the USB connect the computer to download the data, which can scan, query and print the latest 100 time and method of opening.

2.CEU can set password to open the door, can set time, and can also be used as an external power supply to open the door in case the battery in the safe runs out.

3. The intelligent safe records every operation of the hotel guests, service staff and manager to the safe. These operation information are stored in the safe chip, which is unique and cannot be changed.
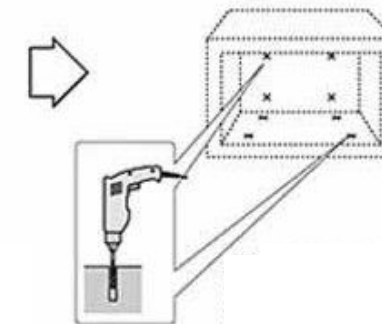

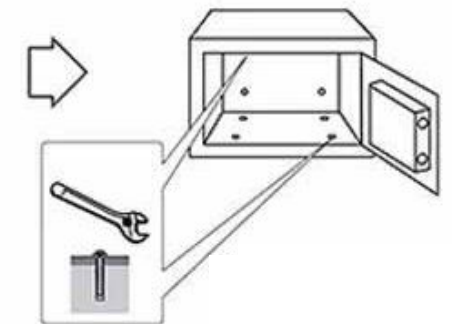

Manage password cracking

The password sends a record query
 Please put the safe in the proper position and mark the drilling hole with a pen.

The electric drill is prepared in advance, and the mounting hole with a 1mm bit is drilled to a depth of about 55mm.

Insert the plastic expansion pipe into the drilled hole, place the safe, screw in the self-tapping screw and tighten the screw with a wrench to complete the installation.
